---

## LANGUAGES AND TECHNOLOGIES

- **Proficient:** HTML, HAML, Tailwind CSS, JavaScript, Ruby, Ruby on Rails, React.js, Git, RSpec, React Native
- **Exposure:** Heroku, Figma, C++, C#, PostgreSQL, MATLAB

---

## PROFESSIONAL EXPERIENCE

**Proudcloud | Software Engineer | Quezon City, Philippines** March 2022 – Present

- Developed and maintained web application ([Challonge](#)) using Ruby on Rails and React, creating features that improved user experience and increased performance
- Identified bottlenecks and bugs, and devised solutions to these problems
- Participated in daily scrum, sprint planning and other agile development practices
- Interfaced with clients, estimated about 80% hands-on development and 20% client interaction & documentation
- Utilized testing tools such as RSpec to ensure code quality
- Maintained and updated existing codebase by refactoring code, fixing bugs, and updating dependencies

---

## PROJECT WORK

**Teachbook | Developer | [Code URL](#) | [Live](#)** 2022

*A Ruby on Rails learning management application for teachers and students to submit academic requirements.*

- Built a feature where teachers can create an exam with grading points and students can answer the exam.
- Developed an extra layer of user authorization using Pundit to restrict the viewing of grades to select users.
- Set up ActionMailer to send confirmation emails to users and require them to authenticate.
- Curated the visual design in Figma and implemented the FE features with the TailwindCSS framework.

**PTAKA Stock Market App | Developer | [Code URL](#) | [Live](#)** 2022

*A Ruby on Rails application that allows users to buy and sell stocks using virtual money.*

- Implemented a feature that allows users to stay logged in unless they log out using Devise and Devise JWT. Developed a well-built CRUD in order for the traders to buy and sell stocks with correct computations.
- Implemented a comprehensive and simple image and video upload using Cloudinary gem.
- Created the look using Figma and executed all frontend styling with CSS framework Tailwind

**Slack Clone | Developer | [Code URL](#) | [Live](#)** 2021

*A React messaging app allowing users to send and receive messages, create channels, and invite users to channels.*

- Utilized Axios to access the Avion School API and allow a user to send a message to a group or individual user.
- Implemented protected routes in React in order to protect pages from unauthorized users.
- Created a feature where users can experience message updates from group chats and private messages.
- Used localStorage to store headers and prevent automatic logout after browser closes or reloads.

---

## EDUCATION

**Full Stack Web Development, Avion School** 2022

**B.S. Computer Engineering, Mapua University** 2021

---

## CERTIFICATION

**[Complete React Native in 2022: Zero to Mastery \(with Hooks\)](#), Udemy** 2022
